3 Composition/information on ingredients

· Chemical characterization: Mixtures

· Description:

Mixture of the substances listed below with harmless additions.

· Dangerous components:

 64742-82-1
 Naphtha (petroleum), hydrodesulfurized heavy; Low boiling point hydrogen treated naphtha; benzene <0,1 %</td>
 10-20%

 ★ Xn R65
 Asp. Tox. 1, H304
 10-20%

 • Additional information For the wording of the listed risk phrases refer to section 16.
 10-20%

4 First aid measures

· Description of first aid measures

· After inhalation

- Move to fresh air in case of accidental inhalation of fumes from overheating or combustion. Move to fresh air in case of accidental inhalation of vapours. Consult a doctor after significant exposure.
- · After skin contact Instantly wash with water and soap and rinse thoroughly. If skin irritation persist, call a physician.
- After eye contact Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician.
- \cdot After swallowing Do not induce vomiting; immediately call for medical help.
- · Information for doctor
- · Most important symptoms and effects, both acute and delayed No further relevant information available.
- · Indication of any immediate medical attention and special treatment needed No further relevant information available.

5 Firefighting measures

- · Extinguishing media
- Suitable extinguishing agents Foam
- CO2, sand, extinguishing powder. Do not use water.
- · For safety reasons unsuitable extinguishing agents High volume water jet
- · Special hazards arising from the substance or mixture
- Carbon monoxide (CO)
- Nitrogen oxides (NOx)
- Sulphur dioxide (SO2)
- Advice for firefighters
- · Protective equipment: In the event of fire, wear self contained breathing apparatus

6 Accidental release measures

- Personal precautions, protective equipment and emergency procedures Particular danger of slipping on leaked/spilled product.
- Product forms slippery surface when combined with water.
- Wear protective equipment. Keep unprotected persons away. Keep away from ignition sources
- Environmental presentions:
- Environmental precautions:
- Prevent from spreading (e.g. by damming-in or oil barriers). Do not allow to enter drainage system, surface or ground water.
- Do not allow to enter the ground/soil.
- Methods and material for containment and cleaning up:
- Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).
- Dispose of contaminated material as waste according to item 13.
- Reference to other sections

See Section 8 for information on personal protection equipment.

7 Handling and storage

· Handling

Precautions for safe handling Keep containers tightly sealed.

Provide sufficient air exchange and/or exhaust in work rooms. When using, do not eat, drink or smoke. Ingestion, exposure to skin and eyes and inhalation of any general vapours should be avoided.

- Keep away from heat and direct sunlight.
- Do not inhale the vapours released during application.
- · Information about protection against explosions and fires:
- Keep ignition sources away Do not smoke. Protect from heat.
- · Conditions for safe storage, including any incompatibilities
- · Storage
- Requirements to be met by storerooms and containers: Prevent any penetration into the ground. Use only containers specifically permitted for this substance/product.
- Keep packaging securely closed and dry, store at +5 °C to +30 °C.
- · Information about storage in one common storage facility:
- Store away from foodstuffs.
- Store away from flammable substances.
- · Further information about storage conditions: Protect from heat and direct sunlight.
- · Storage class
- As per VCI (1991) storage classification concept.
- 10
- · Specific end use(s) Oil for air-cooled two-stroke engines.

8 Exposure controls/personal protection

- · Additional information about design of technical systems: No further data; see item 7.
- · Control parameters
- · Components with limit values that require monitoring at the workplace:
- The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace.
- Additional information: The lists that were valid during the compilation were used as basis
- · Exposure controls
- · Personal protective equipment
- General protective and hygienic measures
- Take off immediately all contaminated clothing
- Do not inhale gases / fumes / aerosols.
- Do not carry cleaning cloths impregnated with the product in trouser pockets.

(Contd. on page 3)

Version number 2

Revision: 08.02.2012

Trade name: Hilti Two-stroke oil DSH

- Wash hands during breaks and at the end of the work.
- Avoid contact with the eyes and skin. Do not eat, drink or smoke while working,
- · Breathing equipment:
- Not necessary if room is well-ventilated.
- Use breathing protection only when aerosol or mist is formed.
- · Protection of hands: Oil resistant gloves
- · Material of gloves Nitrile rubber, NBR
- · Penetration time of glove material

10 Stability and reactivity

- · Reactivity
- · Chemical stability
- · Thermal decomposition / conditions to be avoided: No decomposition if used and stored according to specifications.
- · Possibility of hazardous reactions Can form explosive mixtures in air if heated above flash point and/or when sprayed or atomised
- · Conditions to avoid No further relevant information available.
- · Incompatible materials: No further relevant information available.
- · Hazardous decomposition products: none, if stored and handled correctly.

(Contd. on page 4)

BG

- (Contd. of page 2)

- The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed.
- · Eye protection: Safety glasses
- · Body protection: Protective work clothing.

Version number 2

Revision: 08.02.2012

Trade name: Hilti Two-stroke oil DSH

Printing date 08.02.2012

11 Toxicological information

· Information on toxicological effects

· Acute toxicity:

· LD/LC50 values that are relevant for classification:

- 64742-82-1 Naphtha (petroleum), hydrodesulfurized heavy
- Oral LD50 > 2000 mg/kg (rango)
- Primary irritant effect:
- · on the eye: Irritant effect.
- · Sensitization: No sensitizing effect known.

12 Ecological information

· Toxicity

- · Aquatic toxicity: No further relevant information available.
- · Persistence and degradability No further relevant information available.
- Behaviour in environmental systems:
- · Bioaccumulative potential No further relevant information available.
- · Mobility in soil No further relevant information available.
- · Additional ecological information:
- · General notes:
- Do not allow product to reach ground water, water bodies or sewage system, even in small quantities.
- Water hazard class 2 (German Regulation) (Self-assessment): hazardous for water.
- · Results of PBT and vPvB assessment
- · **PBT:** Not applicable.
- · vPvB: Not applicable.
- · Other adverse effects No further relevant information available.

13 Disposal considerations

· Waste treatment methods

· Recommendation

Delivery of waste oil only to offically authorized collectors.

Must not be disposed of together with household garbage. Do not allow product to reach sewage system.

When storing used mineral oil products, ensure that the categories for waste oil and mixing instructions are observed.

Hand over to disposers of hazardous waste.

· European waste catalogue

13 00 00 OIL WASTES AND WASTES OF LIQUID FUELS (except edible oils, and those in chapters 05, 12 and 19)

13 02 00 waste engine, gear and lubricating oils

13 02 05* mineral-based non-chlorinated engine, gear and lubricating oils

· Uncleaned packagings:

· Recommendation:

Disposal must be made according to official regulations.

Packagings that cannot be cleaned are to be disposed of in the same manner as the product.
