This product contains a positive electrode (Nickel(III)-oxidehydroxide), a negative electrode (metallhydride powder) and electrolyte (potassium hydroxide / sodium hydroxide).

The physical form of the product, however, precludes exposure to workers under normal conditions of use.

· Dangerous compone	ents:	
CAS: 12054-48-7 EINECS: 235-008-5	nickel dihydroxide Resp. Sens. 1, H334; Muta. 2, H341; Carc. 1A, H350i; Repr. 1B, H360D; STOT RE 1, H372; Aquatic Acute 1, H400; Aquatic Chronic 1, H410; Acute Tox. 4, H302; Acute Tox. 4, H332; Skin Irrit. 2, H315; Skin Sens. 1, H317	0-20%

### **SECTION 4: First aid measures**

· 4.1 Description of first aid measures

General information

This product contains an organic electrolyte. If the electrolyte is leaking out of the battery pack, the following measures have to be taken.

- After inhalation Take affected persons into the open air and position comfortably
- After skin contact Instantly wash with water and soap and rinse thoroughly. If skin irritation persist, call a physician.
- After eye contact Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician.
- · After swallowing
- Rinse out mouth and then drink plenty of water.
- Do not induce vomiting; immediately call for medical help.
- 4.2 Most important symptoms and effects, both acute and delayed No further relevant information available.
- 4.3 Indication of any immediate medical attention and special treatment needed
- No further relevant information available.

## **SECTION 5: Firefighting measures**

- 5.1 Extinguishing media
- Suitable extinguishing agents

Water spray, carbon dioxide (CO2), carbon dioxide blanket, foam, or dry powder. Dry sand

- 5.2 Special hazards arising from the substance or mixture
- Formation of toxic gases is possible during heating or in case of fire.
- 5.3 Advice for firefighters
- Protective equipment:

In the event of fire, wear self contained breathing apparatus

Safety data sheet according to 1907/2006/EC, Article 31 / ISO 11014

Version number 1

Revision: 23.01.2015

Trade name: NiMH Batteries

Printing date 23.01.2015

 SFB 105 / SFB 125 / SFB 126 / SFB 155 / SFB 185 / B 24/3,0
 PSA 80 / PRA 801 / PRA 82 / PRA 810 / PRA 87 / PPA 82

(Contd. of page 2)

Use personal protective equipment. Ensure adequate ventilation. Remove all sources of ignition.

### **SECTION 6: Accidental release measures**

• **6.1 Personal precautions, protective equipment and emergency procedures** Wear protective equipment. Keep unprotected persons away. Keep away from ignition sources

• 6.2 Environmental precautions: Do not allow to enter the ground/soil.

- 6.3 Methods and material for containment and cleaning up:
- Collect mechanically.

Dilute with much water.

- 6.4 Reference to other sections
- See Section 7 for information on safe handling
- See Section 8 for information on personal protection equipment.
- See Section 13 for information on disposal.

### **SECTION 7: Handling and storage**

#### · 7.1 Precautions for safe handling

Do not soak in water or seawater.

- Do not expose to strong oxidizers.
- Do not give a strong mechanical shock or fling.
- Never disassemble, modify or deform.
- Do not connect the positive terminal to the negative terminal with electrically conductive material.
- Use only the chargers / electric tools specified by Hilti to charge or discharge the battery.

## Information about protection against explosions and fires:

- Do not throw into fire or expose to high temperatures (>85 °C).
- Do not connect the positive terminal to the negative terminal with electrically conductive material.

#### · 7.2 Conditions for safe storage, including any incompatibilities

- · Storage
- Requirements to be met by storerooms and containers: Avoid direct sunlight, high temperature, high humidity. Store in a cool place (temperature: -20 °C ~ 35 °C, humidity: 45 - 85%) Information about storage in one common storage facility:
- Store away from water.
- Do not store together with electrically conductive materials.
- Further information about storage conditions:
- The accu-pack should be stored at 30 to 50% of the charging capacity.
- Avoid storing in places where it is exposed to static electricity.
- Protect from heat and direct sunlight.
- Protect from humidity and keep away from water.

#### · Storage class

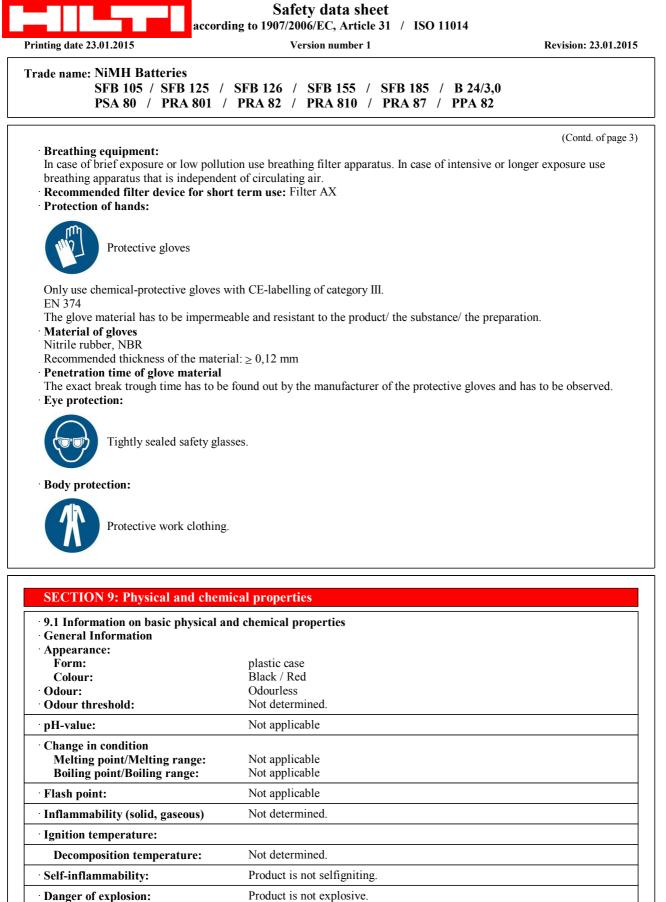

- As per VCI (1991) storage classification concept.
- 11
- 7.3 Specific end use(s) To be used only for the intended purpose. Please refer to the operating instructions.

### **SECTION 8: Exposure controls/personal protection**

- Additional information about design of technical systems: No further data; see item 7.
- · 8.1 Control parameters
- Components with limit values that require monitoring at the workplace: No technical measures are necessary during normal use. In case of leakage of substances contained within the cell, the information below may be useful.
  - Additional information: The lists that were valid during the compilation were used as basis.
- · 8.2 Exposure controls
- · Personal protective equipment
- · General protective and hygienic measures

The usual precautionary measures should be adhered to general rules for handling chemicals.

(Contd. on page 4)

## **SECTION 10: Stability and reactivity**

- 10.1 Reactivity
- 10.2 Chemical stability
- Thermal decomposition / conditions to be avoided: No decomposition if used according to specifications.
- 10.3 Possibility of hazardous reactions

In the event of misuse of a battery cell or the like, oxygen or hydrogen accumulates in the cell and the cell's internal pressure rises. These gases may be emitted through the gas release vent. The gases may ignite if in the proximity of a naked flame or source of ignition.

· 10.4 Conditions to avoid

Do not connect the positive terminal to the negative terminal with electrically conductive material.

Do not overcharge.

Protect from heat and direct sunlight.

Protect from humidity and keep away from water.

- 10.5 Incompatible materials: Conductive materials, water, seawater, strong oxidizers and strong acids.
- 10.6 Hazardous decomposition products: Acrid or harmful gas is emitted during fire

## **SECTION 11: Toxicological information**

- · 11.1 Information on toxicological effects
- · Acute toxicity:
- Primary irritant effect:
- on the skin:

This product contains an organic electrolyte. If the electrolyte is leaking out of the battery pack, the following effects are known when getting into contact:

Caustic effect on skin and mucous membranes.

 $\cdot$  on the eye: Strong irritant with the danger of severe eye injury.

• Sensitisation: No sensitizing effect known.

· CMR effects (carcinogenity, mutagenicity and toxicity for reproduction) None

## **SECTION 12: Ecological information**

- · 12.1 Toxicity
- Aquatic toxicity: No further relevant information available.
- 12.2 Persistence and degradability No further relevant information available.
- 12.3 Bioaccumulative potential No further relevant information available.
- 12.4 Mobility in soil No further relevant information available.
- · Additional ecological information:
- · General notes:
- Do not allow battery packs to penetrate the soil.
- The battery cell may corrode and electrolyte may leak.
- 12.5 Results of PBT and vPvB assessment
- **PBT:** Not applicable.
- **vPvB:** Not applicable.

#### **SECTION 15: Regulatory information**

• 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture No further relevant information available.

• 15.2 Chemical safety assessment: not required.

### **SECTION 16: Other information**

These data are based on our present knowledge. However, they shall not constitute a guarantee for any specific product features and shall not establish a legally valid contractual relationship.

**Relevant phrases** 

H302 Harmful if swallowed.

- H314 Causes severe skin burns and eye damage.
- H315 Causes skin irritation.
- H317 May cause an allergic skin reaction.
- H332 Harmful if inhaled.
- H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled.
