## SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### 1.1 Product identifier

Trade name : Shell Gadus S2 V220 00

Product code : 001D8449

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

Use of the Sub- : Automotive and industrial grease.

stance/Mixture

Uses advised against

This product must not be used in applications other than those listed in Section 1 without first seeking the advice of the sup-

plier.

#### 1.3 Details of the supplier of the safety data sheet

Manufacturer/Supplier : ORBICO BULGARIA EOOD

24 Chelopeshko shousse street

BG - 1839 BG- Sofia

Telephone : +359 2 40 24 500

Telefax

Contact for Safety Data

Sheet

: office@orbicolubricants.bg

1.4 Emergency telephone number

: +359 2 915 42 33 / +359 2 915 44 11

# **SECTION 2: Hazards identification**

## 2.1 Classification of the substance or mixture

#### Classification (REGULATION (EC) No 1272/2008)

Based on available data this substance / mixture does not meet the classification criteria.

## 2.2 Label elements

#### Labelling (REGULATION (EC) No 1272/2008)

Hazard pictograms : No Hazard Symbol required

Signal word : No signal word

Hazard statements : PHYSICAL HAZARDS:

Not classified as a physical hazard according to CLP

criteria.

**HEALTH HAZARDS:** 

According to EC No 1907/2006 as amended as at the date of this SDS

# Shell Gadus S2 V220 00

Version Revision Date: SDS Number: Date of last issue: 09.09.2022

3.8 23.09.2022 800001006652 Print Date 24.09.2022

Not classified as a health hazard under CLP criteria.

**ENVIRONMENTAL HAZARDS:** 

Not classified as environmental hazard according to

CLP criteria.

Precautionary statements : Prevention:

No precautionary phrases.

Response:

No precautionary phrases.

Storage:

No precautionary phrases.

Disposal:

No precautionary phrases.

Safety data sheet available on request.

Sensitising components : Contains alkyl thiadiazole.

Contains Bismuth Naphthenate. Contains naphthenic acid. Contains Zinc Naphthenate May produce an allergic reaction.

# 2.3 Other hazards

This mixture does not contain any REACH registered substances that are assessed to be a PBT or a vPvB.

Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis.

Used grease may contain harmful impurities.

High-pressure injection under the skin may cause serious damage including local necrosis.

Not classified as flammable but will burn.

# **SECTION 3: Composition/information on ingredients**

#### 3.2 Mixtures

Chemical nature : A lubricating grease containing highly-refined mineral oils and

additives.

The highly refined mineral oil contains <3% (w/w) DMSO-

extract, according to IP346.

Classification based on DMSO extract content < 3% (Regula-

tion (EC) 1272/2008, Annex VI, Part 3, Note L).

Components

Chemical name	CAS-No. EC-No. Index-No.	Classification	Concentration (% w/w)
	Registration number		
Bismuth Naphthenate	85736-59-0	Skin Sens. 1B; H317	0,1 - 0,99

According to EC No 1907/2006 as amended as at the date of this SDS

# Shell Gadus S2 V220 00

Date of last issue: 09.09.2022 Version Revision Date: SDS Number:

For explanation of abbreviations see section 16.

#### **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

Protection of first-aiders : When administering first aid, ensure that you are wearing the

appropriate personal protective equipment according to the

incident, injury and surroundings.

If inhaled No treatment necessary under normal conditions of use.

If symptoms persist, obtain medical advice.

In case of skin contact Remove contaminated clothing. Flush exposed area with wa-

ter and follow by washing with soap if available.

If persistent irritation occurs, obtain medical attention.

When using high pressure equipment, injection of product under the skin can occur. If high pressure injuries occur, the casualty should be sent immediately to a hospital. Do not wait

for symptoms to develop.

Obtain medical attention even in the absence of apparent

wounds.

In case of eye contact Flush eye with copious quantities of water.

Remove contact lenses, if present and easy to do. Continue

rinsing.

If persistent irritation occurs, obtain medical attention.

If swallowed In general no treatment is necessary unless large quantities

are swallowed, however, get medical advice.

#### 4.2 Most important symptoms and effects, both acute and delayed

: Oil acne/folliculitis signs and symptoms may include formation Symptoms

According to EC No 1907/2006 as amended as at the date of this SDS

## Shell Gadus S2 V220 00

Version Revision Date: SDS Number: Date of last issue: 09.09.2022

3.8 23.09.2022 800001006652 Print Date 24.09.2022

of black pustules and spots on the skin of exposed areas. Ingestion may result in nausea, vomiting and/or diarrhoea.

Local necrosis is evidenced by delayed onset of pain and tissue damage a few hours following injection.

#### 4.3 Indication of any immediate medical attention and special treatment needed

Treatment : Notes to doctor/physician:

Treat symptomatically.

High pressure injection injuries require prompt surgical intervention and possibly steroid therapy, to minimise tissue dam-

age and loss of function.

Because entry wounds are small and do not reflect the seriousness of the underlying damage, surgical exploration to determine the extent of involvement may be necessary. Local anaesthetics or hot soaks should be avoided because they can contribute to swelling, vasospasm and ischaemia. Prompt surgical decompression, debridement and evacuation of foreign material should be performed under general anaesthet-

ics, and wide exploration is essential.

## **SECTION 5: Firefighting measures**

## 5.1 Extinguishing media

Suitable extinguishing media : Foam, water spray or fog. Dry chemical powder, carbon diox-

ide, sand or earth may be used for small fires only.

Unsuitable extinguishing

media

Do not use water in a jet.

## 5.2 Special hazards arising from the substance or mixture

Specific hazards during fire-

fighting

: Hazardous combustion products may include:

A complex mixture of airborne solid and liquid particulates and

gases (smoke).

Carbon monoxide may be evolved if incomplete combustion

occurs.

Unidentified organic and inorganic compounds.

# 5.3 Advice for firefighters

Special protective equipment:

for firefighters

Proper protective equipment including chemical resistant gloves are to be worn; chemical resistant suit is indicated if large contact with spilled product is expected. Self-Contained Breathing Apparatus must be worn when approaching a fire in a confined space. Select fire fighter's clothing approved to

relevant Standards (e.g. Europe: EN469).

Specific extinguishing meth-

ods

Use extinguishing measures that are appropriate to local cir-

cumstances and the surrounding environment.

According to EC No 1907/2006 as amended as at the date of this SDS

# Shell Gadus S2 V220 00

Version Revision Date: SDS Number: Date of last issue: 09.09.2022

3.8 23.09.2022 800001006652 Print Date 24.09.2022

#### **SECTION 6: Accidental release measures**

#### 6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions : 6.1.1 For non emergency personnel:

Avoid contact with skin and eyes. 6.1.2 For emergency responders: Avoid contact with skin and eyes.

#### 6.2 Environmental precautions

Environmental precautions : Use appropriate containment to avoid environmental contami-

nation. Prevent from spreading or entering drains, ditches or rivers by using sand, earth, or other appropriate barriers.

#### 6.3 Methods and material for containment and cleaning up

Methods for cleaning up : Prevent from spreading or entering into drains, ditches or riv-

ers by using sand, earth, or other appropriate barriers.

#### 6.4 Reference to other sections

For guidance on selection of personal protective equipment see Section 8 of this Safety Data Sheet., For guidance on disposal of spilled material see Section 13 of this Safety Data Sheet.

#### **SECTION 7: Handling and storage**

#### 7.1 Precautions for safe handling

Technical measures : Use local exhaust ventilation if there is risk of inhalation of

vapours, mists or aerosols.

Use the information in this data sheet as input to a risk assessment of local circumstances to help determine appropriate controls for safe handling, storage and disposal of this

material.

Advice on safe handling : Avoid prolonged or repeated contact with skin.

Avoid inhaling vapour and/or mists.

When handling product in drums, safety footwear should be worn and proper handling equipment should be used.

Properly dispose of any contaminated rags or cleaning mate-

rials in order to prevent fires.

## 7.2 Conditions for safe storage, including any incompatibilities

Further information on stor-

age stability

: Keep container tightly closed and in a cool, well-ventilated

place.

Use properly labeled and closable containers.

Store at ambient temperature.

Refer to section 15 for any additional specific legislation cov-

ering the packaging and storage of this product.

According to EC No 1907/2006 as amended as at the date of this SDS

# Shell Gadus S2 V220 00

Version Revision Date: SDS Number: Date of last issue: 09.09.2022

3.8 23.09.2022 800001006652 Print Date 24.09.2022

Packaging material : Suitable material: For containers or container linings, use mild

steel or high density polyethylene.

Unsuitable material: PVC.

Container Advice : Polyethylene containers should not be exposed to high tem-

peratures because of possible risk of distortion.

7.3 Specific end use(s)

Specific use(s) : Not applicable

## **SECTION 8: Exposure controls/personal protection**

## 8.1 Control parameters

#### **Occupational Exposure Limits**

Components	CAS-No.	Value type (Form of exposure)	Control parameters	Basis
Oil mist, mineral	Not As- signed	TWA	5 mg/m3	BG OEL
Oil mist, mineral		TWA (inhalable fraction)	5 mg/m3	US. ACGIH Threshold Limit Values
Oil mist, mineral		TWA	5,0 mg/m3	BG OEL

#### **Biological occupational exposure limits**

No biological limit allocated.

#### 8.2 Exposure controls

#### **Engineering measures**

The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances. Appropriate measures include:

Adequate ventilation to control airborne concentrations.

Where material is heated, sprayed or mist formed, there is greater potential for airborne concentrations to be generated.

#### General Information:

Define procedures for safe handling and maintenance of controls.

Educate and train workers in the hazards and control measures relevant to normal activities associated with this product.

Ensure appropriate selection, testing and maintenance of equipment used to control exposure, e.g. personal protective equipment, local exhaust ventilation.

Drain down system prior to equipment break-in or maintenance.

Retain drain downs in sealed storage pending disposal or subsequent recycle.

Always observe good personal hygiene measures, such as washing hands after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

According to EC No 1907/2006 as amended as at the date of this SDS

## Shell Gadus S2 V220 00

Version Revision Date: SDS Number: Date of last issue: 09.09.2022

3.8 23.09.2022 800001006652 Print Date 24.09.2022

Due to the product's semi-solid consistency, generation of mists and dusts is unlikely to occur.

#### Personal protective equipment

The provided information is made in consideration of the PPE directive (Council Directive 89/686/EEC) and the CEN European Committee for Standardisation (CEN) standards.

Personal protective equipment (PPE) should meet recommended national standards. Check with PPE suppliers.

Eye protection : If material is handled such that it could be splashed into eyes,

protective eyewear is recommended. Approved to EU Standard EN166.

Hand protection

Remarks : Where hand contact with the product may occur the use of

US: F739) made from the following materials may provide suitable chemical protection. PVC, neoprene or nitrile rubber gloves Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material, dexterity. Always seek advice from glove suppliers. Contaminated gloves should be replaced. Personal hygiene is a key element of effective hand care. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly. Application of a non-perfumed moisturizer is recommended. For continuous contact we recommend gloves with breakthrough time of more than 240 minutes with preference for > 480 minutes where suitable gloves can be identified. For short-term/splash protection we recommend the same but recognize that suitable gloves offering this level of protection may not be available and in this case a lower breakthrough time maybe acceptable so long as appropriate maintenance and replacement regimes are followed. Glove thickness is not a good predictor of glove resistance to a chemical as it is dependent on the exact composition of the glove material.

gloves approved to relevant standards (e.g. Europe: EN374,

depending on the glove make and model.

Skin and body protection : Skin protection is not ordinarily required beyond standard

work clothes.

It is good practice to wear chemical resistant gloves.

Glove thickness should be typically greater than 0.35 mm

Respiratory protection : No respiratory protection is ordinarily required under normal

conditions of use.

In accordance with good industrial hygiene practices, precautions should be taken to avoid breathing of material. If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker health, select respiratory protection equipment suitable for the specific conditions of use and meeting relevant legislation.

According to EC No 1907/2006 as amended as at the date of this SDS

10.5 Incompatible materials

Materials to avoid : Strong oxidising agents.

10.6 Hazardous decomposition products

No decomposition if stored and applied as directed.

**SECTION 11: Toxicological information** 

11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

Information on likely routes of:

exposure

Skin and eye contact are the primary routes of exposure alt-

hough exposure may occur following accidental ingestion.

**Acute toxicity** 

**Product:** 

Acute oral toxicity : LD50 (rat): > 5.000 mg/kg

Remarks: Low toxicity:

Based on available data, the classification criteria are not met.

Acute inhalation toxicity : Remarks: Based on available data, the classification criteria

are not met.

Acute dermal toxicity : LD50 (Rabbit): > 5.000 mg/kg

Remarks: Low toxicity:

Based on available data, the classification criteria are not met.

Skin corrosion/irritation

**Product:** 

Remarks : Slightly irritating to skin.

Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil

acne/folliculitis.

Based on available data, the classification criteria are not met.

Serious eye damage/eye irritation

**Product:** 

Remarks : Slightly irritating to the eye.

Based on available data, the classification criteria are not met.

According to EC No 1907/2006 as amended as at the date of this SDS

# Shell Gadus S2 V220 00

#### Respiratory or skin sensitisation

**Product:** 

Remarks : For respiratory and skin sensitisation:

Not a sensitiser.

Based on available data, the classification criteria are not met.

**Components:** 

Naphthenic acid:

Remarks : May cause an allergic skin reaction in sensitive individuals.

Germ cell mutagenicity

**Product:** 

Genotoxicity in vivo : Remarks: Non mutagenic

Based on available data, the classification criteria are not met.

Germ cell mutagenicity- As-

sessment

This product does not meet the criteria for classification in

categories 1A/1B.

Carcinogenicity

**Product:** 

Remarks : Not a carcinogen.

Based on available data, the classification criteria are not met.

Remarks : Product contains mineral oils of types shown to be non-

carcinogenic in animal skin-painting studies.

Highly refined mineral oils are not classified as carcinogenic by the International Agency for Research on Cancer (IARC).

Carcinogenicity - Assess-

ment

This product does not meet the criteria for classification in

categories 1A/1B.

Material	GHS/CLP Carcinogenicity Classification
Highly refined mineral oil	No carcinogenicity classification.

## Reproductive toxicity

**Product:** 

Effects on fertility

Remarks: Not a developmental toxicant., Does not impair fertility., Based on available data, the classification criteria are

not met.

Reproductive toxicity - As- : This product does not meet the criteria for classification in

According to EC No 1907/2006 as amended as at the date of this SDS

sessment categories 1A/1B.

STOT - single exposure

**Product:** 

Remarks : Based on available data, the classification criteria are not met.

STOT - repeated exposure

Product:

Remarks : Based on available data, the classification criteria are not met.

**Aspiration toxicity** 

**Product:** 

Not an aspiration hazard., Based on available data, the classification criteria are not met.

11.2 Information on other hazards

**Further information** 

**Product:** 

Remarks : Used grease may contain harmful impurities that have accu-

mulated during use. The concentration of such harmful impurities will depend on use and they may present risks to health

and the environment on disposal.

ALL used grease should be handled with caution and skin

contact avoided as far as possible.

Remarks : High pressure injection of product into the skin may lead to

local necrosis if the product is not surgically removed.

Remarks : Slightly irritating to respiratory system.

Remarks : Classifications by other authorities under varying regulatory

frameworks may exist.

Remarks : Unless indicated otherwise, the data presented is representa-

tive of the product as a whole, rather than for individual com-

ponent(s).

#### **SECTION 12: Ecological information**

## 12.1 Toxicity

**Product:** 

Toxicity to fish : Remarks: LL/EL/IL50 > 100 mg/l

Practically non toxic:

Based on available data, the classification criteria are not met.

According to EC No 1907/2006 as amended as at the date of this SDS

# Shell Gadus S2 V220 00

Date of last issue: 09.09.2022 Version Revision Date: SDS Number:

3.8 23.09.2022 800001006652 Print Date 24.09.2022

Toxicity to daphnia and other : Remarks: LL/EL/IL50 > 100 mg/l

aquatic invertebrates

Practically non toxic:

Based on available data, the classification criteria are not met.

Remarks: LL/EL/IL50 > 100 mg/l Toxicity to algae/aquatic plants

Practically non toxic:

Based on available data, the classification criteria are not met.

Toxicity to fish (Chronic tox-

icity)

Remarks: Based on available data, the classification criteria are not

met.

Toxicity to daphnia and other : aquatic invertebrates (Chron-

ic toxicity)

Remarks: Based on available data, the classification criteria are not

met.

Toxicity to microorganisms

Remarks: Based on available data, the classification criteria are not

met.

#### 12.2 Persistence and degradability

**Product:** 

Biodegradability Remarks: Not readily biodegradable.

Major constituents are inherently biodegradable, but contains com-

ponents that may persist in the environment.

#### 12.3 Bioaccumulative potential

**Product:** 

Bioaccumulation Remarks: Contains components with the potential to bioaccumulate.

## 12.4 Mobility in soil

**Product:** 

Mobility Remarks: Semi-solid under most environmental conditions., If

it enters soil, it will adsorb to soil particles and will not be mo-

bile.

Remarks: Floats on water.

## 12.5 Results of PBT and vPvB assessment

**Product:** 

This mixture does not contain any REACH registered sub-Assessment

stances that are assessed to be a PBT or a vPvB..

## 12.6 Endocrine disrupting properties

no data available

According to EC No 1907/2006 as amended as at the date of this SDS

# Shell Gadus S2 V220 00

Date of last issue: 09.09.2022 Version Revision Date: SDS Number:

23.09.2022 800001006652 Print Date 24.09.2022 3.8

#### 12.7 Other adverse effects

## **Product:**

Additional ecological information

Does not have ozone depletion potential, photochemical ozone creation potential or global warming potential.

Product is a mixture of non-volatile components, which will not be released to air in any significant quantities under normal conditions of use.

Poorly soluble mixture.

Causes physical fouling of aquatic organisms.

Unless indicated otherwise, the data presented is representative of the product as a whole, rather than for individual component(s).

Mineral oil does not cause chronic toxicity to aquatic organisms at concentrations less than 1 mg/l.

## **SECTION 13: Disposal considerations**

#### 13.1 Waste treatment methods

Product Recover or recycle if possible.

> It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste classification and disposal meth-

ods in compliance with applicable regulations.

Waste product should not be allowed to contaminate soil or ground water, or be disposed of into the environment. Do not dispose into the environment, in drains or in water

Do not dispose of tank water bottoms by allowing them to drain into the ground. This will result in soil and groundwater

contamination.

Waste arising from a spillage or tank cleaning should be disposed of in accordance with prevailing regulations, preferably to a recognised collector or contractor. The competence of the collector or contractor should be established beforehand.

MARPOL - see International Convention for the Prevention of Pollution from Ships (MARPOL 73/78) which provides technical aspects at controlling pollutions from ships.

Dispose in accordance with prevailing regulations, preferably Contaminated packaging

> to a recognized collector or contractor. The competence of the collector or contractor should be established beforehand. Disposal should be in accordance with applicable regional.

national, and local laws and regulations.

Local legislation

Waste catalogue

The regulatory information is not intended to be comprehensive. Other regulations may apply to this material.

#### The components of this product are reported in the following inventories:

REACH : Not established.

TSCA : All components listed.

#### 15.2 Chemical safety assessment

No Chemical Safety Assessment has been carried out for this substance/mixture by the supplier.

#### **SECTION 16: Other information**

#### **Full text of H-Statements**

H315 : Causes skin irritation.

H317 : May cause an allergic skin reaction.
H319 : Causes serious eye irritation.

H332 : Harmful if inhaled.

H411 : Toxic to aquatic life with long lasting effects.

H413 : May cause long lasting harmful effects to aquatic life.

According to EC No 1907/2006 as amended as at the date of this SDS

## Shell Gadus S2 V220 00

Version Revision Date: SDS Number: Date of last issue: 09.09.2022

3.8 23.09.2022 800001006652 Print Date 24.09.2022

#### Full text of other abbreviations

Acute Tox. : Acute toxicity

Aquatic Chronic : Long-term (chronic) aquatic hazard

Eye Irrit. : Eye irritation
Skin Irrit. : Skin irritation
Skin Sens. : Skin sensitisation

BG OEL : Bulgaria. Ordinance on the Protection of Workers from Risks

related to Exposure to Chemical Agents at Work.

BG OEL / TWA : Time weighted average

BG OEL / TWA : 8-hr Limit
